

Data Recovery & Hard Drive Data Recovery

Hard drive data recovery is a phrase that no one likes to hear. This phrase is commonly only spoken when disaster has stricken in one form or another and data has been lost. Fortunately, RjPlace System Designs has several specialized *Recovery experts available at a moments notice*. Whether as a backup plan for completing a Data Migration project or as a way to keep a company from losing all of its data, call RjPlace System Designs to get your data recovered quickly.

Remote data backup, offsite servers, CD recording nightly, tape backup, hard drive storage and internet storage are just some of the methods that are utilized at RjPlace System Designs to secure data for our clients. We maintain full backup hard drives for immediate replacement of crashed systems. We'll have your company up and running within minutes with clustering and using the current technology.
